INTRODUCTION

Educators are “encouraged to foster children’s capacity to understand and respect the natural environment and the interdependence between people, plants, animals and the land”.

Responsible ownership of pets, animals or birds that may reside at Jumbunna or visit the premises is vital. Role models of appropriate behaviours with animals and guidance in caring for the needs of animals is beneficial for children. This policy also considers the management of unwanted visitors such as pests and vermin.

ACTIONS - What we are going to do?

Jumbunna will:

- Provide a safe, clean, and humane environment for all animals and birds that visit or reside at Jumbunna.
- Ensure that the health and wellbeing of children is being maintained when engaging with animals.
- Ensure pest control measures are regularly undertaken; and
- Ensure there are procedures in place for removing unwanted animals, pests, and vermin from the premises.

PROCEDURES - How it will be done?

Centre Pets and Invited Visitors

- Educators will ensure that all pets and their enclosures are kept clean and hygienic. Educators must ensure they have clean bedding and water. Food is available for the pet but kept out of reach of children at all times.

- Children must be supervised at all times when interacting with pets or animals. Educators will manage any health or safety risk for the children that may be caused by animals, such as asthma and allergies.
- Pets will not have access to children's bedding, toys, food preparation areas, eating surfaces or utensils.
- Animals and birds visiting Jumbunna as part of the educational program are the responsibility of the owner(s). The educators will ensure that the environment remains safe and hygienic at all times during the visit. Educators will complete risk assessment paperwork in relation to the visit.

Animals and Birds Other than Pets or Invited Visitors

- There are situations that may spontaneously occur, involving animals. For example, there may be a situation where an animal or bird has made its way into Jumbunna. Educators may use this as a spontaneous learning experience for the children. At all times they will ensure the safety and wellbeing of the children.
- If an animal or bird is potentially dangerous, such as a snake or spider, educators will contact an appropriate authority for assistance. If appropriate contact Richmond Valley Council Ranger **02 6660 0300** (8.30am – 5pm as well as after hours). In NSW the authority is the National Parks and Wildlife Service – **1300 361 967** (8.30am – 5pm) or NSW Wildlife Information, Rescue and Education Service Inc on 13 000 WIRES – **1300 094 737**.
- The animal's movements should be monitored to ensure a speedy and efficient capture by a professional, but priority is to be given to educator, child, and family safety. At no time is the potentially dangerous animal, insect, or bird to be approached or touched by educators, children, or families.

Pests and Vermin

- Pest control will occur at Jumbunna on an annual basis. Educators will monitor any occurrences in the service to determine the success of control measures.
- If pests and vermin are seen, educators will advise the nominated supervisor. Jumbunna is responsible for arranging additional pest control visits.
- Where appropriate, educators discuss with children safety issues relating to dangerous products, plants, vermin, and objects.
- Educators will thoroughly clean all areas that animals or pests have accessed in Jumbunna with hot, soapy water. If the remains of an animal or animal faeces have been found, the remains will be disposed of according to the local Council guidelines and the area where the remains were found will be thoroughly disinfected with hot, soapy water.
- Educators will be responsible for assessing any situation in Jumbunna where animals are involved to ensure the health, safety and wellbeing of children, families, and animals.

Evaluation

The presence of animals in Jumbunna will be managed by educators to ensure that the safety and wellbeing of children, families, educators, and animals is maintained at all times. Educators will consider the risks versus the benefits of including animals in the educational program.
